Anand Kumar Badarala

anand.badarala@gmail.com | 9441148377 | Chennai, Tamil Nadu | linkedin.com/in/anand-kumar-385148326

PROFESSIONAL SUMMARY

Aspiring Software Engineer with a strong foundation in Data Structures & Algorithms, Object-Oriented Programming, DBMS, and software development principles. Proficient in Python, Java, C, SQL, and REST APIs, with hands-on experience building academic and personal projects. Passionate about solving problems, writing clean and efficient code, and learning new technologies. Seeking an opportunity to apply technical skills and contribute to developing reliable and scalable software solutions.

TECHNICAL SKILLS

Programming Languages: Python, Java, C, SQL

Software Development: Object-Oriented Programming (OOP), Data Structures & Algorithms, SDLC, REST API Development

Database Technologies: MySQL, DBMS, SQL Queries

Version Control & Tools: Git, GitHub, VS Code, Jupyter Notebook

Software Engineering Practices: Agile Methodology, Debugging, Unit Testing, Code Reviews, Problem Solving

EDUCATION

B.Tech – CSE (AI & ML) 2022 – 2026

Bharath Institute of Higher Education and Research, Chennai, India | CGPA: 8.47

Intermediate (Class XII) 2020 – 2022

Narayana Junior College, Bhimavaram, India | 73.2%

Secondary School (Class X) 2019 – 2020

Bhashyam High School, Bhimavaram, India | CGPA: 9.9

PROJECTS

Task Management System · **Python, REST APIs, MySQL, Git, GitHub**

- Developed a task management application that allows users to create, update, delete, and track tasks efficiently
- Designed RESTful APIs for task operations and implemented backend business logic following software development best practices
- Utilized MySQL for persistent data storage and optimized database queries for improved performance
- Applied Data Structures and Object-Oriented Programming concepts to build scalable and maintainable software components
- Performed debugging, testing, and version control using Git and GitHub

Automated Irrigation System using IoT & Deep Learning · **Python, IoT Sensors, Deep Learning, Cloud Platform**

- Built a real-time irrigation monitoring system that collects soil moisture, temperature, and humidity data using IoT sensors
- Trained a deep learning model to predict optimal irrigation schedules based on environmental sensor inputs
- Integrated a cloud platform to enable remote monitoring, data logging, and automated control of irrigation pumps

Brain Tumor Detection using Deep Learning · **Python, TensorFlow, Keras, OpenCV**

- Designed a Convolutional Neural Network (CNN) to classify brain MRI and CT scan images into tumor and non-tumor categories
- Applied image preprocessing techniques including resizing, normalization, and augmentation using OpenCV to improve model accuracy
- Evaluated model performance using accuracy, precision, and recall metrics; achieved high classification accuracy on the test dataset

CERTIFICATIONS

- JPMorgan Chase & Co. – Software Engineering Job Simulation (Forage)
- Certified Agentforce Specialist – Salesforce
- Tata Group – Data Analytics Job Simulation (Forage)
- Cognifyz Certified Python Developer
