Chennai, Tamil Nadu | [anand.badarala@gmail.com](mailto:anand.badarala@gmail.com) | 9441145377 | [linkedin.com/in/anand-kumar-385148326](https://www.linkedin.com/in/anand-kumar-385148326)

## PROFESSIONAL SUMMARY

Enthusiastic Entry-Level Software Engineer and B.Tech CSE (AI & ML) graduate eager to begin a full-time career in software development. Solid project experience in Java, Python, and JavaScript covering frontend, backend, databases, REST APIs, and version control with Git. Strong foundation in data structures, algorithms, OOP, debugging, and application optimization. Certified by Tata, JPMorgan, and Cognifyz with 3 virtual internships completed.

## TECHNICAL SKILLS

|                          |                                                                                 |
|--------------------------|---------------------------------------------------------------------------------|
| <b>Languages:</b>        | Python, Java, C, JavaScript (basic)                                             |
| <b>Web Development:</b>  | HTML5, CSS3, Frontend & Backend Basics, REST API Integration                    |
| <b>Databases:</b>        | MySQL, DBMS, Query Writing, Data Storage Management                             |
| <b>Tools:</b>            | Git, GitHub, Jupyter Notebook, Browser DevTools                                 |
| <b>Core CS Concepts:</b> | Data Structures & Algorithms, OOP, Debugging, Testing, Application Optimization |
| <b>ML / AI:</b>          | TensorFlow, Keras, OpenCV, CNN, Supervised & Unsupervised Learning              |

## INTERNSHIP EXPERIENCE

### Software Engineering Intern

*Extion Infotech | Virtual | Jul 2024 – Sep 2024*

- Developed software projects using Python and Java gaining hands-on frontend and backend development experience.
- Worked with MySQL databases and REST APIs to build data-driven application features; participated in debugging and optimization.
- Used Git for version control and collaborated in team development workflows following agile practices.

### Software Engineering Intern

*Internpe | Virtual | Sep 2024 – Oct 2024*

- Applied data structures, algorithms, and OOP concepts to write efficient Python code; performed unit testing and debugging.
- Contributed to application optimization cycles and maintained version-controlled code using Git.

### Python Developer Intern

*Cognifyz Technologies | Virtual*

- Built Python software projects integrating MySQL databases and APIs; practiced version control and collaborative development.

## PROJECTS

### Automated Irrigation System – IoT & Deep Learning

- Developed IoT + deep learning Python project with frontend dashboard, backend data processing, and cloud API integration; debugged and optimized for reliability.
- Tech Stack: Python, Deep Learning, IoT Sensors, Cloud Platform, Git

### Brain Tumor Detection – Deep Learning

- Built medical image classification system using Python, TensorFlow/Keras, and OpenCV demonstrating strong OOP, DSA, and debugging skills.
- Tech Stack: Python, TensorFlow/Keras, OpenCV, CNN, Git

## EDUCATION

|                                                                                                         |                               |
|---------------------------------------------------------------------------------------------------------|-------------------------------|
| <b>B.Tech – CSE (AI &amp; ML)</b><br><i>Bharath Institute of Higher Education and Research, Chennai</i> | Sep 2022 – 2026<br>CGPA: 8.47 |
| <b>Intermediate (XII)</b><br><i>Narayana Junior College, Bhimavaram</i>                                 | 2020 – 2022<br>73.2%          |
| <b>Secondary (X)</b><br><i>Bhashyam High School, Bhimavaram</i>                                         | 2019 – 2020<br>CGPA: 9.9      |

## CERTIFICATIONS & SIMULATIONS

- Tata Group – Data Analytics Job Simulation (Forage)
- JPMorgan Chase & Co. – Software Engineering Job Simulation (Forage)
- Cognifyz Certified Python Developer
